

WANTED

BY THE DEPARTMENT OF ENERGY

EXCESSIVE ENERGY CONSUMPTION.

This Energy Hog was last seen lurking in homes without enough insulation and homes with older heating and air-conditioning systems. He's responsible for causing high energy bills in homes across the U.S. To protect your home, install a programmable thermostat to save as much as 10% a year on heating and cooling bills. Adding insulation is the best protection from this fugitive.

If you have any information on this case, or would like to learn more about a Federal Tax Credit as a reward, go to www.energyhog.org
